

Custom Badges for Custom Printed Projects

Custom Badges

Custom printed category guide

- Custom Pins
- Custom Buttons

Compare custom badges by use case, structure, material direction, artwork needs, and the child category that best matches your project before confirming specifications.

How to Choose Custom Badges

- Start from the product, audience, and how the item will be used, carried, displayed, mailed, or kept.
- Compare the child-category paths instead of assuming one material or construction fits every request.
- Treat material, finish, structure, packing, and compliance needs as specification questions until reviewed.
- Avoid fixed claims about lead time, MOQ, certifications, or shipping before the final specification is confirmed.

Choose the Right Custom Badges Type

- Custom Pins — Custom Pins for projects where the exact size, material direction, artwork, finish, and use case should be confirmed before production.

- Custom Buttons — Custom Buttons for projects where the exact size, material direction, artwork, finish, and use case should be confirmed before production.

Custom Printing and Specification Notes

Custom Badges projects should start from the real use case rather than a generic product name. The important questions are size, artwork, material direction, finish, packing, usage environment, and the child category that best describes the request.

This page intentionally avoids fixed MOQ, lead-time, certification, eco-material, factory-direct, or global-shipping promises. Those details depend on final specification, artwork, quantity, destination, and compliance review.
