Wire-O Binding [↑](#)

Wire-O Binding is a type of binding that uses a wire to hold the pages together. It is a common type of binding for notebooks and small books. The wire is usually made of steel and is twisted into a spiral shape. The pages are then inserted into the spiral and the binding is closed.

Wire-O Binding is available in three different sizes: 4:1, 3:1, and 2:1. The 4:1 size is the most common and is suitable for most notebooks. The 3:1 size is suitable for larger notebooks and the 2:1 size is suitable for very large notebooks. The Binding101 website provides more information about Wire-O Binding and how to choose the right size for your needs. [\[1\]](#)

MyBinding is a website that provides information about different types of book binding. It includes a section on Wire-O Binding, which explains how it works and how to choose the right size for your needs. The website also provides a link to the Binding101 website, which provides more information about Wire-O Binding. [\[2\]](#)
